### Re: 3520A and 3521A Pneumatic Leak Test Modules

Introduced in 2012, the 3520A and 3521A leak test modules with mechanical regulators were the first releases of Sciometric's 3520 Series leak test family. These modules are being discontinued effective immediately, replaced by the newer technology capable of addressing a greater range of requirements.

The discontinued models can be identified by their part numbers with key elements identified below:

- The pressure decay version – 10500-3520-xxxA
- Flow models – 10500-3521-xxxA

#### Key Dates

Product Discontinuation Notice	Effective immediately
Warranty Support until	<b>As per Terms and Conditions</b>
Technical Support (on a best effort basis)	Contact Sciometric*

\* Due to limited availability of parts. Your Sciometric representative will determine the best solution for your requirement.

### Alternative Product Options

The new 3520 Series Leak Test Modules offer versatility for a range of leak test applications while using the latest technology to deliver the industry's best accuracy combined with fastest cycle times. [Click here for the datasheet.](#)

For a turnkey solution, integrate up to four 3520 Series modules into the Model 3670 Leak Test Station. [Click here to review the specifications for the Model 3670.](#) Custom options are also available.
